

UniSign Agent

An AI agent that filters university information, identifies opportunities relevant to each student, and helps prepare the next steps toward application.

TEAM Name: Nexus
Path: Pro Code
Problem Statement: Student Experience and Career Readiness (outside the classroom)

TEAM MEMBERS

01 CHAN Tsz Ching

02 LAM Ian Tong

03 TANG Man Yui

04 WEN Sum Yee

The University of Hong Kong

Why Students Miss Relevant Opportunities ?

Information overload: Relevant opportunities are buried in unrelated content

- **High volumes** of campus emails cause students to miss out on **critical** events and **scholarships** that are **essential** for their **academic and personal development**
- Tracking **conflicting event times** and varying deadlines creates constant friction, making it easy for important dates to slip through the cracks

STUDENT NEED

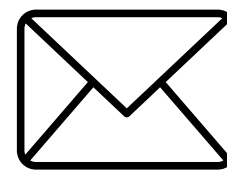

Relevant, timely and manageable actions

01 Information overload

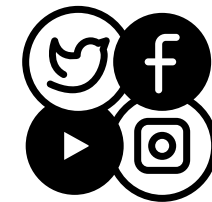

Important events and scholarships are **hidden** in high-volume email, unrelated announcements or in places that students simply don't know to look.

02 Fragmented discovery

Email

Social Media

Opportunities sit across disconnected channels

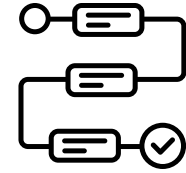

03 Tracking and follow-through

Deadlines, event times and application steps are tracked manually.

Students at **every stage** face this problem. The current prototype focuses on HKU students and can later extend across Hong Kong universities.

01 ONBOARD

Profile, timetable, preference

 **Your Profile**

Display Name * (required)

Alex

Faculty * (required)

School of Computing and Data Science

Year of Study * (required)

Year 1

Programme * (required)

Bachelor of Engineering (Computer Science)

 **Academic Details**

CGPA (Optional)

3.6

Student Status * (required)

Local (Hong Kong)

 **Your Interests**

Interests * (required)

AI, robotics, algorithms, hackathons

Activities & Achievements (Optional)

e.g. HKU Robotics Team, Dean's List, volunteer work

Archive Review: Did I get this right?

I archived this email: **[Aptitude Tests] Fast Track Your Preparation for Numerical Reasoning Assessments in Aptitude Tests**

Reason: Duplicate in this run (same sender and subject).

If you move this to inbox, why is it important?
